Merry Christmas!

OUR NEW PODCAST IS LIVE!

Mike "Cuckoo" Kloch and **Pete "Vapor" Reddan** have teamed up to create the Aviation Rant podcast. Podcast one is posted now. We invite you to listen, provide constructive feedback, and tell your pilot friends.

Description: The podcast where, through fear, sarcasm and ridicule, we rant on various aviation subjects. "Tough love" is administered where necessary, and we provide some possible solutions to the problems we see. Sometimes we talk about things we like.

The podcast can be found on SAW's website **[HERE](#)**, and on Spotify, Amazon podcasts, and Apple podcasts. More platforms are coming.

FORMATION TRAINING

We had a customer who came from Alaska to learn formation and aerobatics. He wants to be a fighter pilot and thought getting a taste of those types of flying would be good. We had many great flights with the spectacular weather we had in the first half of the month.

SAW can offer formation training for anyone who wants a great flying challenge that is incredibly rewarding. Check the website and then call or email to get your questions answered.

A-36 BONANZA WANTED

Cuckoo is still looking for an A-36 Bonanza to lease for a photo shoot. He posted on Facebook a few weeks ago looking for interested owners, but no luck so far. This is also an opportunity to go on a photo shoot, which can be a lot of fun. An airplane with a door or window that is allowed to be removed for flight is needed and can fly at least 120kts. If you know of any possible candidates, please email Mike@Fly-SAW.com.

READY FOR THE NEW YEAR?

It's been a good year at SAW. Our customer base is slowly growing, we have added additional services, and all of our customers have been very satisfied! The year hasn't been without challenges though. We had to do a small wing repair that ended up with 2 months down and a hefty bill.

We are thankful for our maintenance providers, High Desert Aviation and New Moon Aviation, as they have been great at taking care of us when we need their services.

Thanks to the SAW crew for all of their contributions. We have a great bunch of pilots/instructors who do outstanding work. They know I want nothing less than that, but I don't have to remind them, which is nice.

We are looking forward to a great 2025, we have some exciting projects in development that I can't wait to share with everyone when the time is right.

Wishing everyone a Merry Christmas, and/or happy holidays and a happy new year. See you next year!
