PODCAST

Cuckoo was a guest on Vapor's podcast, The Way I Taught it. This is titled, Rant Session 1. Mike & Pete rant about some training and flight school issues. Please listen and forgive the audio quality as it is not great on this podcast. Please feel free to provide constructive criticism and ideas for future rants as we plan to do more. Standby for a new podcast duo coming soon!

The podcast can be found on SAW's website [HERE](#), and on all major podcast platforms.

REGULATION CHANGES

There were some recent Legal Interpretations that cancelled previous interpretations that allowed flight instructors who were not current to be able to be on board an aircraft with a pilot flying to regain their 61.57 currency. This led us initially to believe that operation was no longer allowed.

In fact, a final rule was published on Oct 1 that explicitly allows this kind of operation. Here is the link. Look for 61.56(e)(5).

A-36 BONANZA WANTED

Cuckoo is still looking for an A-36 Bonanza to lease for a photo shoot. He posted on Facebook a couple of weeks ago looking for interested owners, but no luck so far. This is also an opportunity to go on a photo shoot, which can be a lot of fun. An airplane with a door or window that is allowed to be removed for flight is needed and can fly at least 120kts. If you know of any possible candidates, please email Mike@Fly-SAW.com.

UPRT & OTHER ENHANCEMENTS

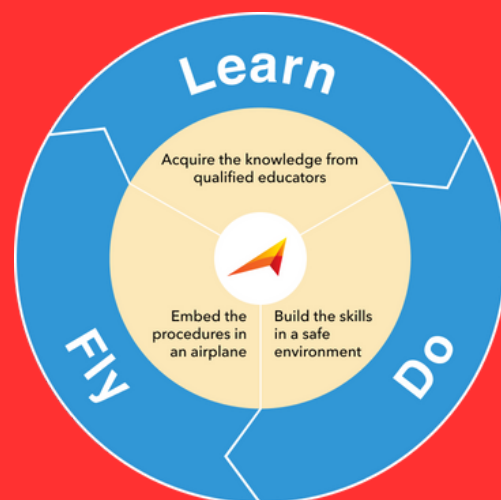

SAW's UPRT courses now include virtual reality (VR) training! Using Aviation Community's Learn-Do-Fly method of teaching, SAW introduces VR training after the ground training in order to practice procedures and drills that will help the Pilot in Training (PT) do better once in the airplane.

We are also introducing VR training in our tailwheel, aerobatics and spin courses. This is all at no extra cost. We are adding to our already top-tier instruction.

To do VR training separate from one of our courses, you can sign up for the cost of ground training, plus \$10/hr for the VR system. A great deal!

Come see what VR training is all about! Check it out on the [SAW website](#).
